

# ***KIT ROLLER HTROLL***

## **High resistance rollers**

**HTRoll** are made of a special compound CPT. The relative weight of each roller is clearly marked on one side.

**HTRoll** are High Tech replacement parts for the original rollers; a complete calibrated set capable of varying your scooter transmission ratio by perfectly regulating velocity and acceleration.

### **Function**

Due to the rotation of the variator, the roller's weight creates a centrifugal force; the greater the roller weight, the greater the centrifugal force, therefore resulting with a faster gear change and viceversa.

### **Variator Calibration**

To optimise your engine's performance, use rollers that maintain your engine's RPMs at your engine's peak power RPMs. Reducing the roller weights will increase the engine's RPMs and increasing the roller weights will reduce the engine's RPMs.

***FOR ORIGINAL  
VARIATORS AND  
MULTIVAR***

# KIT ROLLER HTROLL
