## High resistance rollers

# KIT ROLLER HTROLL

**6613561.Q0**

**6613561.R0**

**NEW!**

€ 26.00

**HTRolls** are made of a special compound CPT. The relative weight of each roller is clearly marked on one side. **HTRolls** are High Tech replacement parts for the original rollers; a complete calibrated set capable of varying your scooter's transmission ratio by perfectly regulating velocity and acceleration.

**Function.** Due to the rotation of the variator, the roller's weight creates a centrifugal force; the greater the roller weight, the greater the centrifugal force, therefore resulting with a faster gear change and viceversa.

**Variator Calibration.** To optimise your engine's performance, use rollers that maintain your engine's RPMs at your engine's peak power RPMs. Reducing the roller weights will increase the engine's RPMs and increasing the roller weights will reduce the engine's RPMs.

## For original variators and Multivar

**66 9417.A0 gr. 03,2**

**ATTENTION:**

When ordering please remember to attach the code letter/number that represents the desired weight to the part number. See example above in **RED**.

MADE IN ITALY

**Prices Excl. Tax** Product reserved exclusively for competitive use in areas designated for competitions, according to regulations stipulated by the relevant sporting authority. We do not accept any liability for improper use.
